

iks **aquastar** *vario 1 pro*

The dosing pump iks aquastar vario 1 pro
(item no. 2005)

This dosing pump is particularly suitable for administering small amounts of liquids. Each dose is approximately 38ml / minute. Using a suitable timing control system such as the ones in the iks aquastar and iks aquastar midi systems, you can administer doses of practically any quantity you like. But this pump can be operated with the timing control system iks aquastar t-con (item no.) as well. This dosing pump is of special interest to those that have an iks aquastar or iks aquastar midi system with a vacant switchable socket output.

Features:

- Space-saving, precise and reliable
- Easy replacement of tubing
- Low energy consumption
- Safe 12V voltage
